

Farm Carbon Consultancy

Farm Carbon Calculator

access and training for consultants

For the past ten years The Farm Carbon Toolkit's Farm Carbon Calculator has been providing valuable insight for farmers and growers, enabling them to calculate their carbon footprint and take steps through our Toolkit to reduce their emissions and increase sequestration.

The Calculator has always been free for farmers and growers to use and is accessed entirely online. It is the most comprehensive and user-friendly carbon calculator available for farmers, and the only one that fully covers carbon sequestration.

**Farm
Carbon
Calculator**

January 2020 sees the launch of the brand new Farm Carbon Calculator, featuring an expanded range of inputs, superior user experience, and improved results portrayal. We believe it to be a leading carbon calculator and have had excellent feedback from farmers and growers.

Pricing

Recently there has been a rapid rise in interest in all things related to farming and carbon. In the last four years monthly calculator sign-ups have gone from less than 10 per month to over 180. In addition, over the past year we have begun offering our own consultancy services to farmers and growers who want to cut their carbon footprint.

The new Calculator has been a significant investment for us, and we need to continue to invest in it for years to come. As a result we have re-assessed the way the Calculator is accessed. For all individual farm users, who are not making profit out the Calculator, it will remain free at the point of use.

Registered address: Blackbirds Perch, St Martin's, Isles of Scilly, TR25 0QN, UK
Farm Carbon Consultancy Ltd, Company number 11381925, VAT number 328 7918 60

However for those using our tools to generate business, such as agronomists, advisors and consultants, we will now be charging for access to the Farm Carbon Calculator. The packages we offer include:

- A range of access options to suit your needs
- A one day training course (face-to-face) in the use of the Farm Carbon Calculator, critical issues in farming and carbon emissions, and advice on testing and measuring for Soil Organic Matter
- Email and phone access to our farm carbon specialists
- Feedback and involvement in future developments of the Farm Carbon Calculator

Below are our annual package costs (exc. VAT):

Package	Number of users	Training	Email or phone access	Annual cost
Bronze	Up to 20	One day	10 hours a year	£3,500
Silver	21 to 50	One day	20 hours a year	£5,000
Gold	Unlimited	Two days	35 hours a year	£7,500

This will enable you to deliver targeted advice to farmers and growers so that they can reduce their carbon footprint. Measurement is essential before the correct management changes can be applied. Re-measuring progress on an annual basis is the basis of assessing progress against targets.
